## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The abstract of the disclosure is objected to because of undue length, as it is approximately 184 words long. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuma (2002/0089781) in view of Dauber (5,417,743). The claims differ from the filter apparatus of Tuma (2002/0089781) in there being a second diffusion channel which is in communication with the inside of the housing enclosure. Dauber ('743) shows a diffusion channel "5" that is in communication with a housing enclosure "15". It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to provide the portion of filter construction "10" of Tuma (2002/0089781) which is in

Art Unit: 1724

communication with housing enclosure "12" to include a diffusion channel, in view of the showing of Dauber ('743), so that the flow between the filter apparatus and the inside of the enclosure will be controlled.

4. The remaining references listed on both the PTO-1449 and the PTO-892 show art of interest.

5. Applicants' response to this Office action should also include the following editorial changes: on Fig. 2, provide a description in the specification of number "132"; page 1, line 17, "and" should be inserted after "hydrocarbons"; page 6, line 3, "figure" should be "Figure"; page 7, line 16, "is" should be "are", and in line 17, "a" should be "an"; page 10, line 4, "enter" should be "enters"; page 11, line 8, "included" should be "including"; and on page 14, line 1, "145 and 144" should be deleted and "144,145" from their present position and should be inserted after "rings".

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Spitzer whose telephone number is (571) 272-1167. The examiner can normally be reached on Monday-Thursday from (5:30AM-4:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
